

Edinburgh Masters in Finance ranked 25th in the World in Financial Times rankings

Edinburgh's Masters in Finance and Investment is the 25th highest ranked finance masters programme in the world. This is one of two new rankings introduced by the Financial Times (FT) with results announced on the 20th June 2011.

Edinburgh's programme featured in the pre-experience ranking which contains programmes designed for new graduates with little or no previous work experience. 30 global business schools are included in the 2011 ranking. In common with other rankings produced by the FT, the ranking is derived from data collected via two surveys one completed by the business school and another by alumni of the programme who graduated 3 years ago.

Edinburgh ranked in the top percentile of those programmes giving students international experience during the Masters programme with 90% of our students being employed three months after graduation contributing strongly to student satisfaction.

Edinburgh's Masters in Finance and Investment is part of a family of finance masters including the Masters in Accounting and Finance and two new programmes starting in 2012 a Masters in Financial Management and a Masters in Banking and Risk. These are all 12-month full-time programmes, designed for new or recent graduates. With its strong investment component the Masters in Finance equips students with the knowledge and skills required for a wide range of finance related professions.

Pre-experience masters degrees are fast becoming the must-have qualification for ambitious young managers. Edinburgh's Masters programmes are highly international with participants, across our portfolio, from over 69 different countries. With outstanding new teaching facilities, international accreditation, the highly ranked research expertise of our faculty, provenance of the University of Edinburgh and indeed the experience of living in Edinburgh our finance programmes are regularly oversubscribed attracting an extremely ambitious student cohort.
